1 Economics with social sciences

Economics with social sciences is a multidisciplinary programme, combining economics with political science or sociology and social psychology (depending on individual choice).

Economics is a subset of economic science. It is concerned with microeconomic behaviour and macroeconomic conditions as well as processes and examines, for example, how private households react to rising prices or how companies respond to higher non-wage labour costs. It deals with the socially relevant, fundamental problem of how scarce production facilities and resources should be managed and proposes solutions. The Bachelor in Economics with Social Sciences programme gives students the necessary knowledge and skills to be able to systematically describe economic problems and identify solutions for them.

Political science examines political processes from the theoretical and empirical perspective in the (sub)national, European and international context. Sociological studies look at the social interrelationships within and between communities, societies and organisations. Social psychology deals with the experience and behaviour of people in the social context.

The Bachelor in Economics with Social Sciences programme gives students the necessary skillset to be able to produce analyses, based on the methods and theory they have learned, on the interplay between the economy and politics or between the economy and society. They are also able to provide recommendations and assessments on the functioning of markets and the political or sociological prerequisites for and repercussions of them.

1.1 Content and objectives of the programme

Graduates have competences at level 6 of the German Qualification Framework or the Bachelor level of the German Qualification Framework for Higher Education Qualifications. Their specific formulation as *Intended Learning Outcome* is:

Graduates...

- ...comprehend and use fundamental microeconomic and game theoretical concepts.
- ...comprehend and use macroeconomic theories and concepts.
- ...comprehend and use mathematical and statistical methods and their respective fields of application.
- ...comprehend political or sociological theories (depending on choice of field of study).
- ...define and evaluate the institutional design of economic systems and processes.
- ...use mathematic and econometric techniques to solve economic problems and for predictions.
- ...comprehend and analyse economic concepts in a historical perspective or understand the economically relevant jurisdictional fundaments of the state.

valid for students of the ER 2015 (enrolment for winter semester 2020/21 at the latest)

- ...use basic qualitative and quantitative methods of political science or of sociological data acquisition and corresponding analysis and identify possible sources of errors.
- ...use economic concepts as well as concepts from social sciences to analyse and evaluate economic (policy) decisions as well as phenomena of the economy and society as a whole.
- ...use techniques of scientific working and good scientific practice.
- ...collect, systemize and specify both relevant literature and data and prepare independently an academic paper/thesis on a selected topic under the advisor's guidance.
- ...discuss their own work with lecturers and other students.
- ...develop their results together with fellow students.
- ...clarify facts using mathematical equations, graphs and tables.
- ... successfully communicate economic topics and topics from social sciences both in writing and orally.
- ...communicate in English language.
- ...justify argumentatively and evaluate independently prepared positions and recommendations of action.
- ...organise independently their own work and learning processes.
- ...are aware of the importance of responsible conduct taking into account social, ethical and economic criteria.
- ...reflect their own work and implement feedback constructively.

Graduates of the Economics with Social Sciences programme have skills that enable them to work in public-sector organisations, in social and political interest groups and in private-sector businesses. Potential jobs for these graduates require an ability to perform independent analysis of the interaction between the economy and politics or between the economy and society. Potential employers are looking for individuals capable of analysing how markets and systems of market regulation work and the conditions required for them to work, using established methods based on economic theory and econometrics. Depending on their specialisation, they should also be able to take into account in their analysis the relevant institutional framework for political decisions concerning reform proposals or to estimate from a sociological perspective the socioeconomic impact of market regulation in a society. A further aim of the programme is to enable graduates to go on to take a master programme in Economics and Political Science/Sociology. Graduates have a strong knowledge of fundamental concepts and methods used in Economics and in Political Science or Sociology. A specific outcome is that they are able to combine economic and social scientific analyses. They have a strong knowledge of the vocabulary and the fundamental analytical methods used in economics and in their other chosen field and are familiar with the relevant institutions. Their methodical skills enable them to critically appraise theoretical, econometric and social scientific

valid for students of the ER 2015 (enrolment for winter semester 2020/21 at the latest)

studies and evaluations. Their solid education in economics means they have the necessary knowledge to be able to assess economic problems and challenges in the areas in which they work. With their concentration on Political Science or Sociology, they are able to combine the economic perspective with a political or sociological viewpoint. As a result, graduates can produce analyses, based on the methods and theory they have learned, on the interplay between the economy and politics or between the economy and society. They are also able to provide recommendations and assessments on the functioning of markets and the political or sociological prerequisites for and repercussions of them.

1.2 Requirements

Successful students will have the following subject-related, methodical and personal strengths and aptitudes:

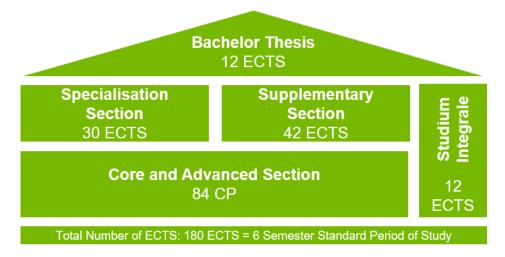

- good mathematical and analytical skills,
- ability to think abstractly and conceptually,
- good communication skills in German and English,
- ability to perform independent, goal-driven and result-oriented work and
- a keen interest in economic issues.

Students with insufficient knowledge in mathematics (e.g. only basic course in high school) are recommended to attend a preparatory module in mathematics which is offered blocked before the regular lectures begin. For further information, have a look in the corresponding module description.

1.3 Programme structure and sequence

The Bachelor in Economics with Social Sciences programme carries 180 credit points (CPs). The standard period of study is six terms and the programme comprises the following subject categories:

The core and advanced category (84 CPs) consists of modules on fundamental economics and methods, all of which are compulsory. The supplementary category (42 CPs) comprises political science, sociology and social research modules. Students are required to choose either the political science or the sociology and social research modules. They then take the "Studium Integrale" (12 CPs). The specialisation category (30 CPs) consists of two specialisation modules and the bachelor's seminar. Students then complete the programme by writing their bachelor thesis (12 CPs).

1.4 Study Abroad Option

The WiSo Faculty offers a broad range of study abroad options within an excellent network of prestigious partner universities worldwide. The so-called Study Abroad Programme (STAP) includes ERASMUS exchanges and provides an opportunity for a single-term stay at one of the WiSo Faculty's partner universities. Successful STAP applicants benefit from direct contact and organisational support at the partner university as well as support in the organisation of the semester abroad by the International Relations Center (ZIB WiSo). Additionally, they are exempt from paying tuition fees there. The range of universities available depends on the bachelor course on which the student is enrolled – the possible options are listed in the WiSo (access through the student's UoC account only), along with detailed information on each university.

Every year, in addition to the STAP programme, the WiSo Faculty organises an exclusive short-term study option WiSo@NYC which takes place in New York City.

valid for students of the ER 2015 (enrolment for winter semester 2020/21 at the latest)

In addition to these options offered by the Faculty, bachelor students can also apply for a non-WiSo exchange, offered by Dezernat 9 – Internationales (Central International Office of the University of Cologne) within the 'fakultätsübergreifende Partnerschaften' framework. Further possibilities are going abroad as a freemover (i.e. as a student who organises his or her stay abroad individually) or participating in short courses or summer schools offered under separate terms and conditions.

1.4.1 The Faculty's Study Abroad Programme (STAP)

Bachelor students should plan their application for a term abroad at the beginning of their bachelor studies. The main selection round for STAP takes place once a year, ending on 15th January. It allows for an application either for fall term or spring term of the following academic year. Detailed information on the selection criteria and the best preparation for a STAP application can be found online.

If there are still places available after the main selection round has been completed, another small secondary selection round will be offered between April and June 1st. In this round, students can only apply for the following spring term.

STAP Bachelor - main selection round (fall term and spring term)

^{*} Alternative offer: if no offer can be given at one of the five preferred universities and if slots at other universities are available.

** End of main selection round. In case any exchange slots become available after 15 March, these slots will be made available in a secondary selection round.

STAP Bachelor – secondary selection round (for spring term only)

^{*} Deadline for handing in FILTERtest results (if taken until 1 June): 15 June. ** Alternative offer: if no offer can be given at one of the five preferred universities and if slots at other universities are available

valid for students of the ER 2015 (enrolment for winter semester 2020/21 at the latest)

1.4.2 Credit transfer options from studies abroad

The WiSo Faculty has put a lot of emphasis on internationalisation in the design of its bachelor programmes, offering broad credit transfer options for all kinds of study abroad options. Each bachelor course includes at least one "Studies Abroad" module, with a broad range of courses suitable for credit transfer. In addition, a single course-to-course credit transfer can be considered. Moreover, students have the option of crediting courses from the semester abroad as part of their Studium Integrale.

For any questions regarding credit transfer, students can contact the <u>ZIB WiSo</u> or the <u>WiSo</u> <u>Credit Transfer Center</u>.

1.5 Module study plan sequence

Due to several factors you need to plan your studies more and more individually. This is caused for example by the fact that some specialisation modules cannot be finished within one term or are solely offered in the winter or summer term. Furthermore, the bachelor's seminar is closely connected with the bachelor thesis in some areas and needs to be completed in the same term. Thus, the following sequences are only recommendations, from which you can or have to diverge depending on your individual study plan.

B.Sc. E	cono	mics with Social Science – Study Direction	on Political Science

1.5.1 Study plans including a semester abroad

a) Study Direction: Political Science

The fifth semester is mostly suitable for studying abroad.

Given the model study plan sequence it should be noted that the Core Module Comparative Analysis of Political Institutions is only offered in winter terms.

In view of the model study plan sequence and the credit transfer options in the specialisation section (12 CP) as well as in the Studium Integrale (12 CP) the two parts of the Studium Integrale should be positioned in the fifth semester in the case of an **exemplary** stay abroad. The Core Module Comparative Analysis of Political Institutions Advanced Module Institutions can be positioned in the third semester. The elective module in the core and advanced section can be moved to the sixth semester. The Bachelor's Seminar is to be planned according to the individual curriculum.

b) Study Direction: Sociology

The fifth semester is mostly suitable for studying abroad.

Given the model study plan sequence it should be noted that the Specialisation Module Seminar Culture/ Values/ Cohesion is only offered in winter terms.

In view of the model study plan sequence and the credit transfer options in the specialisation section (12 CP) as well as in the Studium Integrale (12 CP) the two parts of the Studium Integrale should be positioned in the fifth semester in the case of an **exemplary** stay abroad. The Specialisation Module Seminar Culture/ Values/ Cohesion can be positioned in the third semester and the Elective Module of the Core and Advanced Section can be moved to the sixth semester. The Bachelor's Seminar is to be planned according to the individual curriculum.

c) General remarks

For questions about studying abroad the ZIB WiSo is at your disposal.

Additionally, it is always possible not to request a semester on leave (*Urlaubssemester*) if you spend a semester abroad such that examinations can be taken upon return to the University of Cologne (if it is individually feasible).

1.6 Modules with mid-term examinations

Some modules have courses that only run for half a term and usually with twice the normal number of classes. For these modules, the term is divided into two roughly equal halves. In the fall, the mid-term usually ends at the beginning of December; in the spring, it is usually in the middle or at the end of May. Often, the examinations for these courses are held mid-term, enabling students to reduce their examination load at the end of term.

valid for students of the ER 2015 (enrolment for winter semester 2020/21 at the latest)

The information in the campus management system (KLIPS) regarding the dates of courses and examinations is relevant in this context.

1.7 Calculation of the overall mark

The marks for each examination are determined by the respective examiners. The overall mark for the bachelor degree combines the marks for the various sub-categories, weighted based on the respective number of credit points attainable and each sub-category's contribution towards the overall mark for the examinations for which marks are given. The marks for the sub-categories are calculated as the mean of the examination results in line with the weighting for each examination in terms of the credit points it contributes to the overall mark for the examinations in the respective category for which marks are given. If the result of a module examination is calculated based on several components, the mark is calculated based on a weighting given in the module description. The overall mark for the degree is calculated as the weighted arithmetic mean of the marks for the subject categories and the mark for the bachelor thesis. On the Economics with Social Sciences programme, the weighting for the contributions to the overall mark are as follows:

a) Mark for Core and Advanced Section: 84 of 168 CPs

b) Mark for Supplementary Section: 42 of 168 CPs

c) Mark for Specialisation Section: 30 of 168 CPs

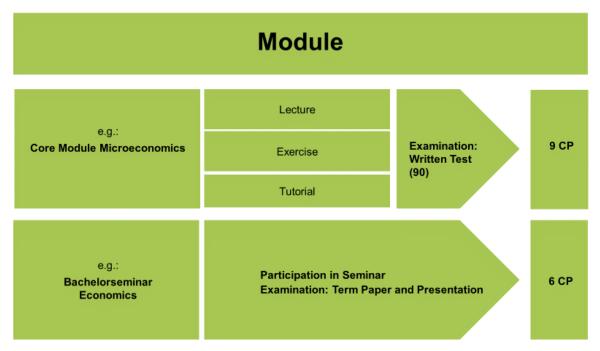

d) Mark for Bachelor Thesis: 12 of 168 CPs.

1.8 Modularity

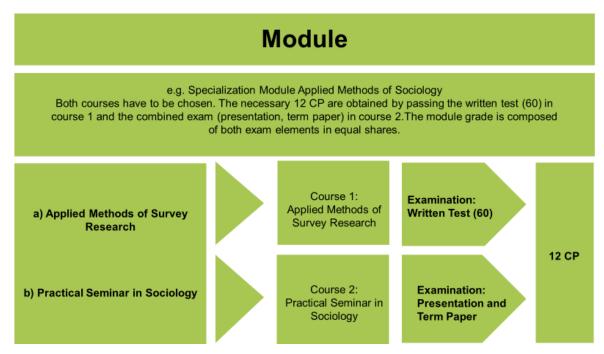

The subject categories on the bachelor programmes are divided into modules, the contents of which are presented in the module descriptions. The bachelor module catalogue can be viewed in the <u>download section</u> of the WiSo Student Services ("WiSo-Studienberatungszentrum") website. Students who pass the necessary examinations are awarded credit points as proof of their successful participation in a module. The module examinations are taken at regular intervals during the programme. Each module consists of various parts and can usually be completed in one or two terms (see the "Duration" section in the module description). A module can consist of lectures, exercises and/or tutorials on the same subject. There are also modules that only comprise one type of class, e.g. a seminar. In some cases, modules offer students a choice between various courses and they are required to take one or more of them. In these cases, the examination can consist of two components (written test in course 1 and a term paper in course 2) or take the form of one, combined examination (a written test covering the content of courses 1 and 2).

When planning your studies, please remember that not every module is offered every term. To find out whether a module is being offered, refer to the "Module availability" section of the module description.

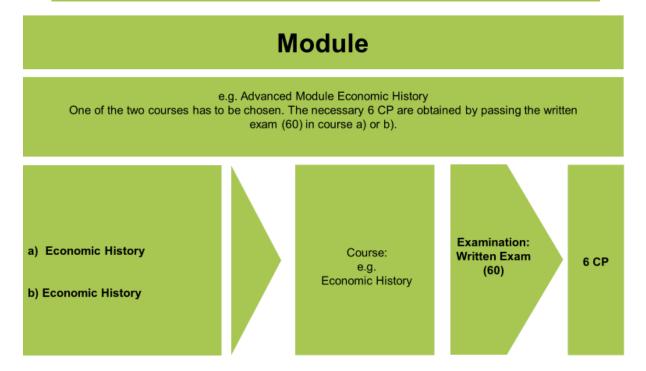

The following examples are to be understood exclusively as illustrations of the individual scenarios; they do not necessarily include modules of the present study programme.

Scenario 1: The module consists of complementary courses on the same subject.

Scenario 2: Students are required to take a combination of courses, each of which ends with its own examination. The CP are awarded once both examinations have been passed.

Scenario 3: Students have to chose one course from a selection and take the exam.

1.9 Rules for failed attempts

Students may retake module examinations that they have failed. The number of attempts is limited to three per module.

In addition, additional three resit attempts can be granted to students at any point of the programme. Students who have accumulated at least 140 credit points are granted a further additional attempt. If a student fails an examination in the three additional attempts and the extra attempt for students with 140 points or more, they are deemed to have failed the programme at the final attempt. However, students may only be eligible for additional attempts beyond the initial three attempts if none of the first three examination attempts were failed due to cheating or to an offence. If the candidate fails a module examination three times, he or she will receive a written notification informing him or her of the options available. We recommend all students who fail the initial three attempts to seek advice from WiSo Student Services ("WiSo-Studienberatungszentrum") before embarking upon an additional attempt.

Where a module examination consists of several components, the candidate must obtain a "bestanden" (pass) mark, or at least an "ausreichend (4,0)" (sufficient) mark, in all of the examination components. All components marked "mangelhaft (5,0)" or "nicht bestanden" (fail) must be retaken.

It is not possible to resit module examinations that have already been passed.

A failed bachelor thesis can be retaken once, with a new topic. Students must register for their second attempt within six months of the result of their first attempt being announced.

2 Support for students

2.1 Course registration in KLIPS 2.0

KLIPS 2.0 is the central campus management system of the University of Cologne. At the WiSo faculty, KLIPS 2.0 serves as a student organization tool. Students should use it as an online course catalogue, for registration and deregistration of courses and examinations, as well as an overview of the complete study programme and calendar. Information on current dates and deadlines of the WiSo faculty, as well as video tutorials and FAQs about KLIPS can be found on the homepage of WiSo-KLIPS-Support. If you have further questions, feel free to contact WiSo-KLIPS-Support via e-mail (klips-wiso@uni-koeln.de). For account questions, contact the central KLIPS support.

2.2 Exam registration in KLIPS 2.0

Examinations on the various programmes are always managed via KLIPS 2.0. Students must register for them within specified deadlines. Please note that registration for courses without restriction on participation via KLIPS and registration for the corresponding module examinations are two completely separate processes. In the case of courses which are subject to a restriction on participation, an examination registration is generally only possible if a registration for the course has been submitted beforehand. Most examinations in written test form are offered twice per term. Often, this will be to "space out" the dates, i.e. students can choose the date that best fits their examination schedule. In some cases, however, the second examination may be a genuine repetition of the first, depending on the department/institute concerned.

All WiSo Faculty examination candidates are entitled to see their examination papers after they have been marked. For more information, please visit the <u>WiSo Examination Office website</u>.

2.3 Subject-specific and examination advice

General advice for students, especially regarding study options and programme requirements, is available from <u>WiSo Student Services</u> ("WiSo-Studienberatungszentrum") for all programmes at the WiSo Faculty. The WiSo Student Services also offer subject-specific recommendations for students' study plans for the first semester plus information on how the individual programmes are structured. The WiSo Student Services are also the first place students should turn to if they have any other questions or problems concerning their studies. The centre can be contacted by telephone, in person or by email. The opening hours and contact data can be found on the corresponding webpage.

Subject-specific advice is provided during the designated times by the University's faculty members and associated teaching staff ("akademische Mitarbeiterinnen und Mitarbeiter") involved in the teaching on the programme. The designated times are announced by means of notices in the institutes and on the departments'/institutes' websites.

Legally binding information concerning examinations and examination procedures is provided by the <u>WiSo Faculty Examination Office</u>. It also issues transcripts of records in German and English, ranking certificates and letters of assignment to the appropriate term of the programme. All the necessary information, contact details and opening hours can be found on the corresponding webpage.

2.4 Academic Working

To support the academic writing of term and final papers, the University of Cologne offers various courses to practice the process of academic writing by students. These include:

a) Writing advice/consultation

The <u>Kompetenzzentrum Schreiben</u>, the <u>Professional Center</u>, the <u>Kölner Studierendenwerk</u> and the programme <u>SchreibArt</u> offer advice as well as courses related to the issues that arise when writing an academic paper.

b) Literature research

The university library offers various courses especially for researching literature.

c) Text processing and literature administration

The <u>Regionales Rechenzentrum</u> provides courses regarding text processing and literature administration.

Students can register for the courses of the Professional Center and the SchreibArt programme in the **Studium Integrale** under "Kompetenzen für das Studium" (competencies for studies). There are even more offers made by the WiSo-faculty that can be elected in the **Studium Integrale**. Hence, these courses can be credited for your studies.

2.5 Other sources of information and advice

International students who study at the WiSo Faculty for part of their programme can turn to the <u>International Relations Centre</u> ("Zentrum für Internationale Beziehungen" or "ZIB") for help with any questions they have. Cologne University students preparing to study abroad can also contact the ZIB for support. The Centre also runs a variety of summer schools, short programmes and Business English courses. The services, courses and people to contact can be found on the corresponding webpage.

The Faculty's <u>Credit Transfer Centre</u> ("Zentrum für die Anrechnung auswärtiger Leistungen") is responsible for recognising credits accumulated in other institutions. This applies both to credits students have gained at other higher education institutions in Germany or abroad prior to studying at the WiSo Faculty, and to (advance) transfer of credits that students plan to accumulate abroad or have already accumulated abroad as part of a WiSo Faculty programme. This system eliminates the need to make individual inquiries to departments/institutes and examination offices. Students can find out everything they need to know about the transfer process on the corresponding webpage.

The <u>WiSo Career Service</u> offers advice and support for students from the WiSo Faculty looking for an internship or profession that is right for them. It also helps them as they plan their career and apply for jobs. In addition, the WiSo Career Service organises seminars, presentations and special events in cooperation with employers and external and internal experts. It also works with other partners in the Faculty and the University to support and guide students as they decide on a career path.

The <u>WiSo IT Service</u> runs regular courses dealing with standard software and field-specific programs.

In case of study-related or personal difficulties, the <u>psychosocial counselling</u> ("Psycho-Soziale Beratung") of the Kölner Studierendenwerk can be called upon. In addition to psychological and social counselling, it also offers writing and learning counselling and support for pregnant women and students with children.

As a further offer, there is <u>Nightline</u> Cologne, the listening and information telephone of students for students. It is available to all students at Cologne universities and colleges.

The WiSo student council represents the interests of all students from the WiSo faculty. In addition to advice from fellow students it also provides a variety of useful services for studying at the WiSo faculty. Any information can be found at wiso-buero.uni-koeln.de or by directly writing an email to wiso-buero@uni-koeln.de.

3 Module tables and descriptions

3.1 Core and Advanced Section

In accordance with Section 32(1), No. 1 of the Examination Regulations, students must accumulate 84 CPs in the Core and Advanced Section.

Group	Module	СР	CC/EC	Reqd. CP
Economics and Methods	Core Module Microeconomics (Economics with Social Sciences)	9	CC	84
	Core Module Macroeconomics (Economics with Social Sciences)	9	CC	
	CM Statistics	6	CC	
	CM Mathematics	6	CC	
	AM Statistics and Econometrics ¹	6	СС	
	SpM Empirical Methods and Data Analysis ²	6	СС	
	Advanced Module Microeconomics	9	CC	
	AM International Economics (9 CP) ³	9	СС	
	Advanced Module Public Finance	9	CC	
	Advanced Module Economic Policy	9	CC	
	AM Macroeconomics ⁴	6	EC	
	AM Economic History ⁵ , ⁶	6	EC	

¹ The registration for the examination is not possible if the examination for the compulsory module "Advanced Module Statistics" has already been successfully completed.

² The registration for the examination is not possible if the examination for the compulsory module "Advanced Module Econometrics" has already been successfully completed.

³ The registration for the examination is no longer possible if the examination for the compulsory module

[&]quot;Advanced Module International and Monetary Economics" has been successfully completed beforehand.

⁴ The registration for the examination is not possible if the examination for the compulsory module "Advanced Module for Institutions and Applied Economic Research" or "Advanced Module Quantitative Methods" has already been successfully completed.

⁵ This module will be offered for the first time in the academic year 2022/2023 according to the planned schedule.

⁶ The registration for the examination is not possible if the examination for the compulsory module "Advanced Module for Institutions and Applied Economic Research" or "Advanced Module Quantitative Methods" or "Advanced Module Institutions" has already been successfully completed.

3.2 Supplementary Section

In accordance with Section 32(1), No. 2 of the Examination Regulations, students must accumulate 42 CPs in the supplementary section.

Group	Module	СР	CC/EC	Reqd. CP
Political Science	CM International Relations ¹	6	CC	42
	CM Comparative Political Economy ²	6	CC	
	CM Comparative Analysis of Political Institutions ³	6	CC

	CM Ethics and Fundamentals of Academic Work in Social Sciences ⁷ , ⁸	6	СС	
	SpM Practice Seminar Sociology/Social Psychology ⁷ , ⁸	6	CC	

¹ The registration for the examination is not possible if the examination for the compulsory module "Core Module Political Science I (Bachelor)" has already been successfully completed.

² The registration for the examination is not possible if the examination for the compulsory module "Core Module Political Science II (B.Sc.)" has already been successfully completed.

³ The registration for the examination is not possible if the examination for the compulsory module "Core Module Political Science III (B.Sc.)" has already been successfully completed.

⁴ The registration for the examination is not possible if the examination for the compulsory module "Core Module Political Science IV (B.Sc.)" has already been successfully completed.

⁵ Beginning with the academic year 2024/2025 this module becomes a compulsory examination.

⁶ The registration for the examination is not possible if the examination for the compulsory module

[&]quot;Supplementary Module Seminar Sociology" has already been successfully completed.

⁷ The registration for the examination is no longer possible if the examination for the compulsory module

[&]quot;Specialization Module Applied Methods of Sociology" has been successfully completed beforehand.

⁸ This module will be offered for the first time in the academic year 2022/2023 according to the planned schedule.

3.3 Specialisation Section

In accordance with Section 32(1), No. 3 of the Examination Regulations, students must accumulate 30 CPs in the specialisation section.

Group	Module	СР	CC/EC	Reqd. CP
	SpM Current Topics in Economics	12	EC	Min.
	SpM Project/Seminar Empirical Methods and Data Analysis	12	EC	12
	Specialisation Module Institutional Economics and Economic Policy Consulting

Seminar	Bachelorseminar Economics with Social Sciences	6	CC	6

¹ The registration for the examination is not possible if the examination for the compulsory module "Advanced Module for Institutions and Applied Economic Research" or "Advanced Module Institutions" has already been successfully completed.

3.4 Studium Integrale

All of the Faculty's bachelor programmes include an interdisciplinary component, known as the Studium Integrale, in which students accumulate 12 credit points. The Studium Integrale is a university-wide and interdisciplinary component of the courses of study in which academic and professional competences are imparted. The Studium Integrale has both theoretical and practical content, enabling students to focus on more academic aspects or topics related to their future careers enhancing their employability. It aims to teach and develop skills that go beyond subject-specific knowledge or that are related to basic academic and personal traits: scientific curiosity, systematic and analytical thinking, and ability to deal with complexity, a solution-minded outlook plus other abilities such as teamwork and foreign language skills.

The Studium Integrale courses are run jointly by the faculties and the University's Professional Centre. They enable students to pursue their own interests in more depth, gain an insight into other subjects and departments, attend courses dealing with issues of relevance to society, acquire skills relevant to their future careers and attend language classes. The "Universitas" segment offers formats especially designed for the Studium Integrale, such as lecture series on societal issues with related workshops. In addition, the Studium Integrale offers students assistance with their learning and studying, helping them with such questions as how to write an academic paper or how to conduct literature reviews. Periods of training abroad and work experience can also be credited in the Studium Integrale. The Studium Integrale carries 12 credit points in total and formally counts as a module. There is no restriction on the number of attempts possible for Studium Integrale examinations.

Any credit points attained in the Studium Integrale over and above the 12 credit points specified in the study structure are shown on the transcript of records.

3.5 Bachelor Thesis

The bachelor thesis carries 12 CPs and is written at the end of the programme. Its aim is to illustrate that the candidate is capable of working and reflecting independently on a specific problem related to the subject matter covered on the programme, using the necessary methods and within a specified period. On the Economics with Social Sciences programme, the topic of the bachelor thesis must reflect methods from economics and social sciences learned during the programme. Group bachelor theses can also be permitted if a clear distinction between and assessment of each candidate's contribution is possible. Objective criteria that make a clear distinction possible, such as sections, page numbers or topics, are used to indicate which student made which contribution. The total workload required of each group member must exceed the requirements for individual bachelor theses to an appropriate extent. The difficulty and content of a group thesis must meet the same requirements as for theses undertaken individually and independently. The contribution made by each individual must meet the requirements for bachelor theses.

To be allowed to register for the bachelor thesis component, candidates must have acquired at least 100 credit points. In line with the number of credit points it carries, the workload allotted for the thesis is 360 hours, i.e. 12 weeks. Bachelor theses should not be more than 40 pages long. Candidates who have earned all of the necessary credit points, except for the bachelor thesis, must register within a period of one year to write their bachelor thesis. Further and more detailed information concerning bachelor theses can be found in the examination regulations. There is no central registration for the Bachelor thesis. The registration takes place after agreement of the supervision at the individual chairs and/or institutes. The supervision process differs between the supervisors. Information will be provided at the individual chairs or institutes. You will find a central overview of the providers in the Economics area in KLIPS. It is advisable to initiate support in the pre-semester. In the Economics department, the Bachelor's seminar is neither a prerequisite for the Bachelor's thesis nor is there any entitlement to supervision based on participation in a specific Bachelor's seminar. In the Department of Social Sciences, the colloquium replaces the Bachelor's seminar and is completed in the same semester as the Bachelor's thesis.

1	Courses Ecological Econ	omics		Contact Hours 45h	Self- Studies 135h	Course Language English	
2	Module Content This module covers selected issues in ecological economics, i.e. the economics relevant to "space ship Earth". Ecological economics recognises the finiteness of the planet regarding physical (material and energy) resources and limits to absorptive capacities within ecosystems. The module includes natural science foundations, especially the laws of thermodynamics and their relevance for economics. It covers the role of energy conversion in wealth creation, and the role of entropy production in environmental impacts. Implications regarding energy and environmental regulation are discussed.						
3	Learning Objectives Students analyse (current) questions and challenges within the framework of pre-structured contexts communicate continuously and purposefully within teaching and learning groups communicate in English develop an understanding of the impact of decisions that take into account environmental, economic, social and/or ethical criteria.

The first aim is to learn about some of the theoretical models and empirical stylized facts related to inequality and intergenerational mobility. Second, students are supposed to gain a better understanding of the mechanics through which inequality is generated within and across generations. Ideally, the module brings students to the frontier of this important research field and enables them to form an opinion about which policies might be appropriate to fight intergenerationa cycles of poverty.

10	Miscellaneous This module can be studied at foreign higher education institutions or at one of the summer schools organised by the WiSo Faculty. A standardised crediting procedure then applies. Credit is only transferred for courses that: - are clearly linked to the subjects covered at the WiSo Faculty and - have not already been taken at the University of Cologne. Information concerning the crediting procedure is available from the International Relations Center (ZIB). Further information concerning the procedure and the deadlines applicable can be found on the WiSo Credit Transfer Centre's platform at: https://www.anrechnungwiso.uni-koeln.de/.
